

CHALLENGE

Legislative drafting is a career, a skill, a specialised field for attorneys-at-law to pursue. It is a skill that will always be in demand. There is no magic in drafting. Like all careers, it requires hard work. But it can be stimulating. The use of language and the correct choice of words for the solution of a particular problem can be a fascinating and fulfilling experience. The challenge is to dare individuals to enter this legislative labyrinth and let the light in, in this cave of verbal darkness, chaos and obscurities and to exit with the rewarding taste of legislative clarity and victory. Victory for society!
